Kazakhstan is the most efficient and stable economy among the Central Asian CIS countries. The Kazakh agricultural market is growing steadily as the country supplies of investment potentials; modernisation of agricultural enterprises is being accelerated by state support. Agriculture accounted for more than 10% of the GDP in Kazakhstan. Main agricultural produce in arable farming are wheat, barley, rice and cotton. In animal husbandry, the most important role take dairy products, meat, leather and wool. For international suppliers of investment goods like agricultural machines and equipment, seeds, plant protection means, livestock etc., the market offers very good perspectives for sales and cooperation.
